

INTO THE WOODS FEB. 27 • 6 - 7 P.M.

Into The Woods is an opportunity for prospective participants and their families to learn more about each **C.A.M.P. at The Woods** offering and engage in immersive experiences highlighting each program. The in-person evening event includes breakout sessions for each of the four C.A.M.P. courses. Lead faculty instructors for each C.A.M.P. course will facilitate an information session about their specific course. An SMWC Admissions Representative will be present to assist students with the application process.

A virtual component will be offered to meet the needs of those who cannot attend in person.

C.A.M.P. at The Woods

Challenging Ambitions and Maximizing Potential

C.A.M.P. at The Woods

JUNE 9-13, 2025

SAINT MARY-OF-THE-WOODS COLLEGE

C.A.M.P. at The Woods

June 9-13, 2025

High school students who are rising freshmen, sophomores, juniors and seniors are encouraged to participate in the **Challenging Ambitions and Maximizing Potential** or C.A.M.P. at The Woods program and earn two college credits! The program will be facilitated on the SMWC campus from June 9-13, 2025 (5 days).

C.A.M.P. at The Woods registration is for day camp with one overnight stay for all participants on Thursday of camp week. The overnight on-campus experience includes staying in the SMWC residence halls and participating in events. The total costs of \$250 includes a continental breakfast and lunch on campus daily along with an evening meal and on-campus housing on Thursday. All course experience fees are included as well. Scholarships are available to offset the on-campus program fee.

The four C.A.M.P. Courses

The four C.A.M.P. courses are facilitated by key faculty in the academic content areas of **Global Leadership, Equine Industry, Nursing, and Teacher Education**. Participants who complete C.A.M.P. at The Woods earn 2 credit hours.

Choose one of these four:

ED 150: STEM APPLICATIONS IN THE ELEMENTARY CLASSROOM

This course will develop an awareness of and willingness to increase understanding and an application of a growth mindset. ED 150 STEM Applications in The Elementary Classroom is an introductory Education course for high school students who are interested in becoming elementary teachers (PreK-6th grade). The focus is to provide students with experiences integrating Science, Technology, Engineering and Math (STEM) concepts into elementary school curricula through hands-on, engaging activities that align with grade level content standards. An emphasis is placed upon the learning strategy known as "Do It, Talk It, Read It, Write It" that effectively combines learning literacy skills and STEM content for grades kindergarten through sixth grade. Blended learning instructional strategies utilizing a variety of educational technologies will be modeled in ED 150. Inquiry-based learning, problem-solving skills, collaborative learning (teamwork) and creative thinking are all key components of instructional strategies that will be modeled in this course.

GLOBAL - STUDY ABROAD COURSES:

Go GLOBAL - NU 150: NURSES OF THE FUTURE

This C.A.M.P. course is for students considering nursing as a profession and includes topics focused on the expansive role of the professional nurse, the history of nursing, nursing ethics, professional communication, career opportunities, the use of technology and basic nursing skills. Students in NU 150 will get the opportunity to travel to London, England, in Fall 2025.

Go GLOBAL – GL 150: LEADERS OF POSITIVE CHANGE

Students will develop a project proposal that can influence positive change on a globally local (global) level. Students will participate in initiatives that can increase their growth and global mindset in a variety of ways, such as through cultural immersion. GL 150 will have the opportunity to travel to Quito and Galapagos Islands, Ecuador in Fall 2025.

Go GLOBAL – EQ 150: INTRODUCTION TO EQUINE INDUSTRY

This course is designed to introduce pre-college students to the world of equine studies. Students will learn introductory horse handling, riding, grooming and general care instruction, as well as an introduction to the science of the equine industry (nutrition, reproduction, and general physiology of the horse). EQ 150 will have the opportunity to travel to Ireland in Fall 2025.

The three Go Global courses provide a rare opportunity for high school students to participate in a one-week, post-summer camp, faculty-led study abroad experience. In the Fall of 2025, the Go Global: EQ 150 students will be traveling abroad to Ireland, Go Global: GL 150 students will be traveling abroad to Ecuador, and Go Global: NU 150 students will be traveling abroad to England. These trips are all expenses paid by the Lilly Endowment Inc.
